Pereview API Quick Start Guide

- Ensure you are in the APIPull group in Pereview
- Download Postman > https://www.postman.com/downloads/ , set up an account with your email, and create a new workspace.
- Import the latest postman_collection of Pereview API methods into Postman (see attachments)
- Import the client environment template into Postman (see attachments)
- Modify the environment to your company name, api key (contained in environment value), email address, and Pereview password
- Go to the Asset Search method, select your environment, clear any values from the filters, and click send request
